Profile

Final-year BSc (Hons) Computing & IT student and AWS Certified Cloud Practitioner with practical experience setting up routers and Wi-Fi access points, troubleshooting hardware and software issues, and creating staff support guides. Brings customer communication and team leadership experience from airport hospitality management. Seeking an entry-level IT support role or technology graduate programme focused on support and infrastructure.

Technical Skills

- **Cloud & Infrastructure:** AWS (S3, IAM, EC2, AWS CLI), Networking Infrastructure (Routers, Access Points, Wi-Fi Setup), Operating Systems, Systems Analysis.
- **DevOps & Tools**: Python, CI/CD (GitHub Actions), Version Control (Git, GitHub), Remote IT Management Tools.
- **Development & Databases:** MySQL, MongoDB, Web Development Fundamentals.
- **Core Competencies:** Hardware & Software Troubleshooting, Network Configuration, IT Documentation & Staff Training, Technical Support, Operational Leadership.

Education

Bachelor of Science (Honours) in Computing & IT

CCT College Dublin | Expected Graduation: July 2027

Expected Classification: 2:1

- **Relevant Coursework**: Cloud Computing, Networking, Operating Systems, Databases (SQL & NoSQL), Systems Analysis, Software Engineering, Web Development, Statistics.

Certifications

- AWS Certified Cloud Practitioner — Amazon Web Services

Relevant Experience

IT Support Technician & Graphics Designer | Avtronics, Dublin

Jan 2026 – Present

Client: Trumps Plaza, Dublin — IT Support (2026–Present)

- Set up and maintain routers and Wi-Fi access points to support connectivity for staff and customers.
- Troubleshoot hardware, software and connectivity issues affecting daily business operations.
- Create staff guides for remote IT management tools, helping staff carry out routine tasks with less on-site support.
- Support the design of promotional graphics for digital signage and social media, adapting content to different screen sizes and maintaining consistent branding.

Internet Café Workstation Setup | Trumps Plaza, Dublin
Technologies: Windows 11, Autologon, Reboot Restore Rx, RustDesk

- Configured shared customer computers and set up automatic sign-in using Autologon.
- Applied website filtering to restrict access to inappropriate content.
- Installed Reboot Restore Rx to restore computers to a predefined configuration on restart, removing customer-downloaded files and unwanted changes.
- Installed RustDesk to enable remote troubleshooting and ongoing IT support.

Technical Projects

AWS Static Website Deployment | Personal Project

Technologies: AWS S3, IAM, AWS CLI, GitHub Actions, HTML, and CSS

Links: Live Site | GitHub

- Built and hosted a static website using Amazon S3.
- Configured bucket permissions and IAM access for website deployment.
- Set up a GitHub Actions workflow to deploy website updates automatically when changes were pushed to the main branch.

Additional Experience

Duty Manager | SSP UK & Ireland — Dublin Airport

Jun 2022 – Present

- Supervise staff and coordinate daily shifts in a busy airport hospitality environment, prioritising tasks and maintaining service standards.
- Resolve customer enquiries and operational issues, communicating clearly with customers and colleagues under pressure.
- Train staff on workplace procedures and the use of POS and Citrix systems.
- Coordinate stock control and shift handovers, keeping colleagues informed of operational needs and outstanding issues.
