Profile

Penultimate-year BSc (Hons) Computing & IT student (on track for 1:1) with hands-on experience in cloud technologies, Linux systems, networking fundamentals, and DevOps automation.

AWS Certified Cloud Practitioner with practical experience deploying cloud infrastructure, automating deployments using CI/CD pipelines, and troubleshooting enterprise digital platforms.

Strong interest in cloud infrastructure, DevOps practices, and IT support, with proven ability to diagnose issues, communicate with technical and non-technical users, and collaborate in fast-paced environments.

Education

Bachelor of Science (Honours) in Computing and IT
CCT College Dublin — Expected Graduation: July 2027

Relevant coursework: Networking, Operating Systems, Cloud Computing, Databases, System Analysis, Web Development, Statistics, Software Engineering.

Experience

DUTY MANAGER | SSP UK & IRELAND – DUBLIN AIRPORT | JUNE 2022 – PRESENT

- Support day-to-day operations in a high-volume, compliance-driven environment, coordinating 12–18 staff per shift while ensuring service continuity and operational controls.
- Use and troubleshoot enterprise digital systems (Citrix, POS platforms, internal reporting tools, dashboards), developing strong IT systems awareness and analytical thinking.
- Identify, investigate, and resolve operational and technical issues in real time, assessing risk, impact, and appropriate mitigation actions under pressure.
- Contribute to process improvement, optimising workflows and reducing disruption through better communication and coordination.
- Train and onboard new team members, improving process consistency, control adherence, and knowledge sharing.
- Collaborate with multiple airport stakeholders, building strong communication, stakeholder management, and teamwork skills.

Projects

AWS S3 Static Website with CI/CD
Deployed and automated a static website using AWS S3 and GitHub Actions.

Live Site | GitHub
Tech Used: AWS S3, IAM, AWS CLI, GitHub Actions, HTML, CSS

- Configured and hosted a fully static website on AWS S3 with public bucket policies
- Created a secure IAM user and used GitHub Secrets to automate deployments via GitHub Actions
- Developed a CI/CD pipeline that syncs code changes from GitHub to S3 automatically on push
- Gained hands-on experience with cloud storage, IAM permissions, and DevOps automation

Certifications

- AWS Certified Cloud Practitioner

Skills

Technical Skills:
AWS Cloud Practitioner, Git & GitHub, CI/CD Pipelines, GitHub Actions, Linux, SQL, Python, TCP/IP, DNS, Cloud Fundamentals.

Professional Skills:
Technical troubleshooting, Incident response & problem solving, Communication with technical and non-technical users, Team collaboration, Process improvement, Learning new technologies quickly

Languages

English – Fluent | Portuguese – Native
